Marvin P. Tagolimot Jr.

Full-Stack Developer · Next.js · React · TypeScript · Node.js · PostgreSQL

Misamis Oriental, Philippines (Remote, UTC+8) | marvin.tagolimotjr14@gmail.com | github.com/diffident016 | diffident016.github.io | linkedin.com/in/marvin-tagolimot

SUMMARY

Full-stack developer and Computer Engineer building with Next.js, React, TypeScript, Node.js, and PostgreSQL, with 2+ years of professional remote work and 25+ projects shipped since 2021. Currently a Software Engineer at Kaulix, integrating AI agents into React and Node.js applications. Builds business systems that people use daily, including a production payroll and HR platform for a municipal HR office and a salon booking system with online payments. Comfortable owning a feature from Figma design through API, database, testing, pull-request review, and release.

CORE SKILLS

Frontend	Next.js | React | TypeScript | JavaScript | Tailwind CSS | Nuxt 3 / Vue | MUI | Figma-to-responsive UI
Backend & Data	Node.js / Express | REST APIs | PostgreSQL | Supabase | MongoDB | Prisma ORM | Firebase | PocketBase | Python / Flask
Auth, Payments & Email	Clerk / NextAuth | Firebase Auth | Google OAuth | PayMongo / Xendit | Resend | Nodemailer | Web Push
AI Integration	AI agents in app workflows | LLM features | Model Context Protocol (MCP) servers | Claude Code | Cursor
Mobile & Embedded	Flutter / Dart | Android (Java) | ESP32 | Arduino | Raspberry Pi | C / C++ firmware
Cloud & DevOps	Microsoft Azure | Vercel | Docker | Cloudflare (R2, DNS, CDN) | DigitalOcean / Ubuntu VPS | GitHub Actions
Testing & Workflow	Git & GitHub (branches, pull requests, code review) | Jest / Vitest | Playwright / Cypress | Release Please

PROFESSIONAL EXPERIENCE

Kaulix

Oct 2025 – Present

Software Engineer · Full-time

- Build React.js features backed by Node.js services and PostgreSQL data models for production applications.
- Integrate AI agents into application workflows, connecting LLM-driven steps to existing backend logic and data.
- Deploy and operate applications on Microsoft Azure cloud infrastructure.

React · Node.js · PostgreSQL · Microsoft Azure · AI agents

SWEEP CDO Project

Apr 2025 – Sep 2025

Project Technical Assistant I · Project-based

- Built a decision support system's web app in Next.js and TypeScript from Figma designs, including a Leaflet GIS map for comparing candidate sites.
- Developed Python Flask API endpoints that serve machine-learning model results to the app, backed by a SQL database and NextCloud storage.
- Shipped work through feature branches and GitHub pull requests reviewed by the project team.

Next.js · TypeScript · Python · Flask · SQL · Leaflet · NextCloud

Seven365 Pte. Ltd. (Singapore)

Aug 2024 – Apr 2025

Nuxt 3 & Node.js Developer · Remote

- Turned Figma designs into responsive pages and shipped the AtHomes PH real estate site with property search by location, type, and price.
- Built modular Node.js services and APIs over MongoDB and external APIs, using TypeScript on both front end and back end.
- Delivered features for 9 months with a distributed remote team through GitHub pull requests and code review.

Nuxt 3 · Vue.js · TypeScript · Node.js · MongoDB

Freelance Full-Stack Developer · MvP Technologies

2021 – Present

Web, Mobile & Embedded Systems · Part-time

- Delivered 20+ projects end to end for clients, local government offices, student organizations, and capstone teams, from payroll and booking systems to IoT monitoring dashboards.
- Integrated authentication (Firebase Auth, Clerk / NextAuth, Google OAuth), payments (PayMongo / Xendit), and transactional email (Resend, Nodemailer) into client applications.
- Run client work as a small team under the MvP Technologies GitHub organization: issues, pull-request review, CI checks, and versioned releases.

Contract Game Developer

May 2024 – Present

Remote Godot Programmer · Part-time contract

Building an interactive children's storytelling game with story-writing UI, custom mechanics, and networked features (Godot, Nakama, TypeScript).

SELECTED PROJECTS

HRMO Payroll & HR System

GitHub · Live demo

- Lead developer (275+ commits) of a production Next.js payroll and HR platform for a municipal HR office: employees, departments, daily time records (DTR), leave ledgers and requests, and automatic salary computation.
- Built a Python biometrics service that syncs attendance from devices into payroll, with timezone-safe timestamp ingestion; deployed with Docker on an Ubuntu server.
- Added a mobile-first employee portal with web push notifications, Google sign-in, and an admin-only MCP server that lets AI assistants query payroll data.

Next.js · TypeScript · Prisma · PostgreSQL · TanStack Query · MUI · Python · Docker · MCP

Clawholics: Salon Booking System

GitHub · Live site

- Built a nail salon booking app in Next.js with Xendit downpayments, server-enforced booking rules and slot holds, QR-scanned loyalty stamps, and birthday vouchers.
- Built the staff dashboard (action queue, sales figures, new-booking alerts) and admin CMS; migrated live data from Cloudflare D1 to Supabase Postgres and tuned the slowest queries.

Next.js · TypeScript · Clerk · Supabase Postgres · Xendit · Cloudflare R2 · Resend · Vitest

COCO: Cooperative Management System

Private repository

- Built a Flutter Web PWA with administrator, officer, and member roles: member registry with approval and membership-fee gates, ledger and accounting actions, statutory fund allocation, and inventory.

Flutter · Dart · Riverpod · PocketBase · Caddy

Coop Feud: Live Event Game System

Private repository

- Built a two-screen survey game for live events: an operator console drives a read-only audience board on a projector, kept in sync across windows with BroadcastChannel and packaged as a desktop app with Tauri.

React · TypeScript · Vite · Tailwind CSS · Zustand · Tauri · Vitest

Barcode Inventory & POS

GitHub · Live demo

- Built a MERN inventory and point-of-sale system that tracks store stock through barcode scanning.

MongoDB · Express · React · Node.js

Smart Solid Waste Collector & Solar Monitoring System

Live demo · Live demo

- Built IoT systems end to end: ESP32 and Arduino firmware for bin fill-level and solar panel sensors, streaming through Firebase to React dashboards with real-time truck tracking, schedules, and live charts.

React · Firebase · Node.js · ESP32 · C / C++ · ApexCharts

Recippy

GitHub

- Built a responsive recipe manager in React, TypeScript, and Tailwind CSS with category filtering, search, and full create/read/update/delete over a REST API.

React · TypeScript · Tailwind CSS · Express · MongoDB

ORGANIZATIONS & LEADERSHIP

MvP Technologies, Organization admin and developer; builds client systems including Clawholics (salon booking), COCO (cooperative management), and Coop Feud (live event game)

ICpEP.SE USTP, Project Manager, Committee on Web Development; earlier Frontend Developer for the chapter's official, CpExpress, and event websites

iBrgy capstone, Lead contributor of a barangay e-services portal (React, Firebase)

ANI start-up project, Lead developer of a Flutter + Firebase app helping farmers sell produce directly to consumers

EDUCATION & CERTIFICATIONS

BS Computer Engineering, University of Science and Technology of Southern Philippines, 2024
The Complete Full-Stack JavaScript Course and **Object Oriented Programming in C++**, Udemy, 2026
CCNA: Introduction to Networks; Switching, Routing & Wireless; Enterprise Networking, Security & Automation (Cisco, 2023)
